

CHANGE THE WAY YOU PERFORM WORKPLACE HEARING TESTS WITH HEARTEST OCC HEALTH

THE PRODUCTIVITY KILLER: NOISE-INDUCED HEARING LOSS

Continuous exposure to excessive noise levels in workers are a major cause of noise-induced hearing loss globally. This can significantly reduce quality of life, lead to physical and psychological strain, while causing decreased productivity and miscommunication, which can give rise to workplace injuries and accidents.

BENEFITS & KEY FEATURES

- On-site testing by in-house staff
- Reduced worker downtime
- STS & PLH calculations
- Ambient noise attenuation
- Specialised reporting
- Environmental noise warning
- Import or add historic baseline information
- Easy-to-use, customisable protocols
- Cloud-based data management

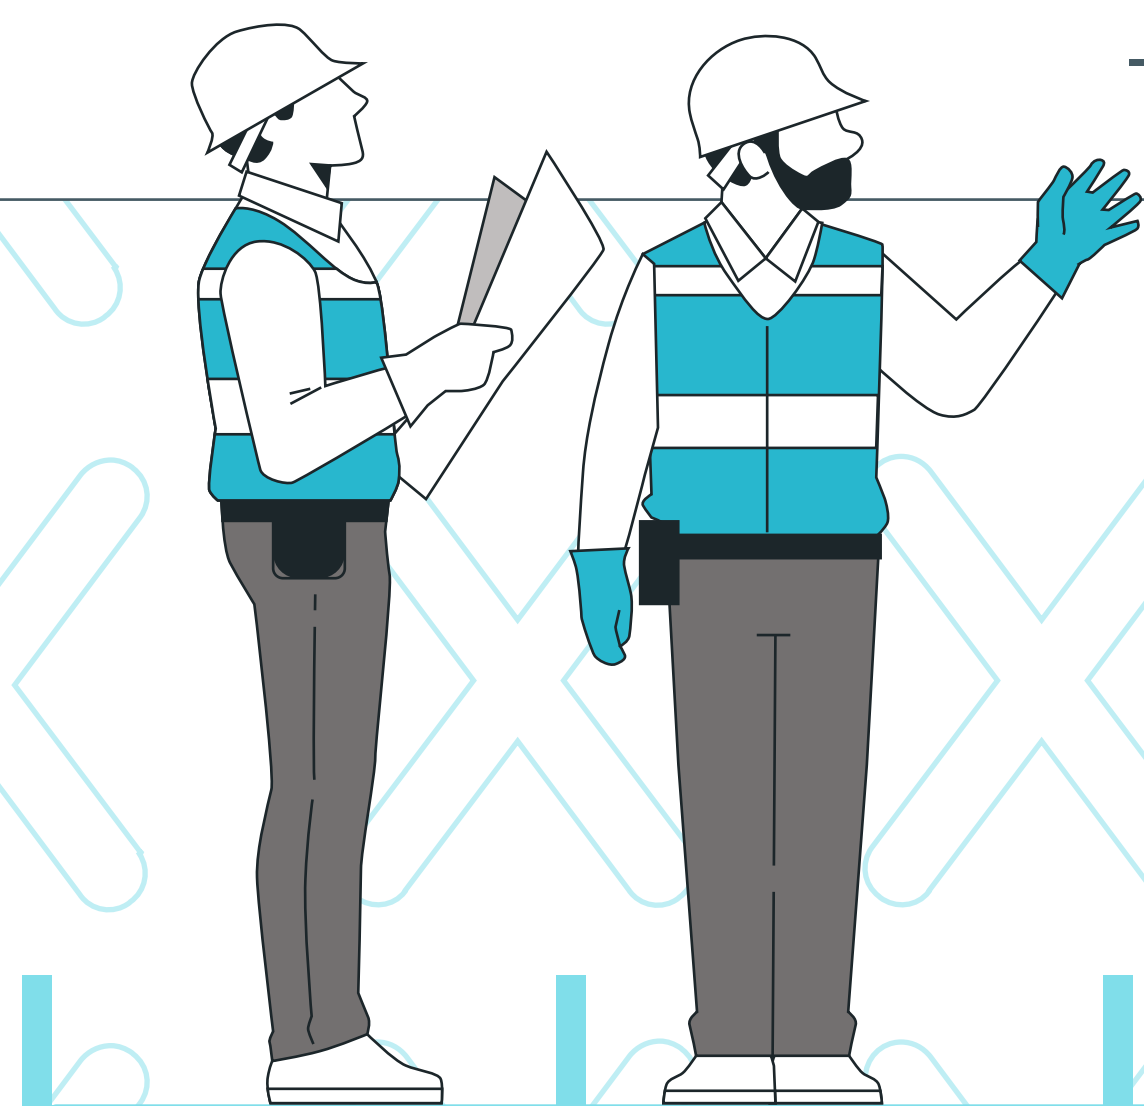

WHAT'S ALL THE NOISE ABOUT? A SOLUTION FOR BOOTHLESS AUDIOMETRY

hearTest Occ Health is a tablet-based, boothless mobile audiometer that can be used anywhere, any time at a fraction of the cost of traditional audiometry solutions. With its ease of use and accessibility, this solution makes it possible to screen employees for hearing loss efficiently, identify potential occupational hearing hazards, and ultimately reduce the risk of work-related noise-induced hearing loss.

"The quality and ease of the device use is exceptional and I can confidently say that it has exceeded our expectations in every way. The results are accurate and always achieved without any great effort. These easy to read results are reported with the ranges being dialed in exactly where I need them to be."

- Martha Pruess, CEO, Florida Neuro Pain & Spine Center, P.A.
