

OCCUPATIONAL SCREENING SPIROMETRY

Presented at the Eduplex Training Institute (ETI) in collaboration with Education for Health Africa (EFHA)

Early detection of breathing difficulties is crucial. Spirometry training gives professionals the skills to accurately test, interpret, and manage lung function, ensuring timely intervention and protecting employee health.

Course Outline

- 80-hour (8-credit) Occupational Screening course
- Aligned with QCTO SP-211002
- Designed for occupational health professionals
